Ha Noi

Education

Ha Noi University of Natural Sciences

Bachelor of Science in Mathematics and Computer Science

2018 - 2022

Skills

Flutter

Android Native

React Native

Java

ReactJS

Objective

Dedicated Mobile Developer with 4+ years of experience specializing in Flutter, Android, and React Native. Strong analytical mindset with expertise in Clean Architecture, Performance Optimization, and Data Visualization. Adept at transforming complex customer requirements into seamless user experiences and robust background services across the full app lifecycle.

Work experience

TRIPSOFT GLOBAL STUDIO (July 2023 - Present)

Mobile Developer(Flutter ,Android Native)

- Developed and maintained multiple mobile applications across productivity and utility domains (Color Pop, Pedometer, AI Money Tracker, GPS Tracker, Photo Cleaner), achieving **high user engagement and retention**
- Designed and implemented core features such as **Google Maps integration, Push Notifications, Home Widgets, and background services**
- Integrated **Firebase suite** (Authentication, Remote Config, FCM, Firestore, Analytics, Crashlytics) to enhance app scalability and monitoring
- Built and maintained **CI/CD pipelines** (Bitbucket Pipelines) to automate build, code signing, and deployment to Google Play & App Store
- Performed **A/B testing and performance optimization**, improving app startup time and reducing memory usage
- Applied **Clean Architecture & Modularization**, leveraging MVVM, Bloc, and Provider for scalable and maintainable codebases
- Integrated **RESTful APIs** with secure data handling and error management
- Embedded **Unity modules** into Android & iOS apps for hybrid functionality
- Implemented **monetization strategies** (AdMob, ad optimization), contributing to revenue growth
- Published, maintained, and continuously improved apps on **Google Play Store & Apple App Store**

VIETTEL SOFTWARE SERVICE (2022 - July 2023)

Frontend Developer

- **Requirements Synthesis & UI/UX Design:** Collaborate closely with stakeholders to analyze business requirements and operational workflows, translating complex needs into **intuitive, user-centric interfaces**.
- **Advanced Data Visualization:** Spearhead the development of interactive and complex data dashboards using **Echarts, Chart.js, and D3.js**, ensuring high-performance rendering of large datasets.
- **Performance Optimization: Refactored and optimized** front-end components to improve rendering speed, responsiveness, and overall user experience across multiple devices.

- **Client Collaboration & Troubleshooting:** Provide direct technical support to clients, ensuring rapid **bug resolution** and seamless integration of custom feature requests.
- **System Evolution:** Maintain and extend the functionality of legacy systems, implementing scalable new features while ensuring backward compatibility and **code maintainability**.

SEATECH Jsc (May 2022 - Dec 2022)

Mobile Developer(Flutter,Java Back End)

- **Requirement Analysis:** Analyzed customer operations to define technical requirements and UI/UX directions.
- **Feature Development:** Developed and maintained core features on existing systems, ensuring high performance and scalability.
- **UI/UX Refinement:** Built and optimized interfaces to enhance user engagement and system responsiveness.
- **Direct Support:** Collaborated directly with clients for bug resolution and technical consulting.
- **App Delivery:** Streamlined the build and release process for multiple mobile apps on App Stores.
